

1. Create the new 'major' table

Search: major_id =		
major_id	major_name	major_min_score
1	General Business	800
2	Accounting	1000
3	Finance	1100
4	Math	1300
5	Engineering	1350
6	Education	900
7	General Studies	500

2. Create the new 'instructor' table

Search: instructor_id =					
instructor_id	inst_first_name	inst_last_name	inst_major_id	inst_year_experience	inst_tenure
1100	eric	schwartz	1 →	10	1
1101	david	bell	2 →	8	1
1102	joe	hall	3 →	12	1
1103	will	matt	4 →	3	0
1104	katy	wilson	5 →	8	1
1105	james	decker	6 →	4	0
1106	neel	ambati	7 →	8	1
neel					

3. Create the new 'class' table

Query Favorites				Query History			
class_id	class_name	class_number	class_instructor_id

23	4 →	25 →
24	4 →	26 →
25	4 →	30 →
26	4 →	31 →
27	4 →	32 →

5. Create the new student_class table

Search:

sc_id	sc_student_id	sc_class_id	
2	11 <input type="button" value="➡"/>	10 <input type="button" value="➡"/>	
3	11 <input type="button" value="➡"/>	11 <input type="button" value="➡"/>	
4	11 <input type="button" value="➡"/>	12 <input type="button" value="➡"/>	
5	12 <input type="button" value="➡"/>	19 <input type="button" value="➡"/>	
6	12 <input type="button" value="➡"/>	40 <input type="button" value="➡"/>	
8	12 <input type="button" value="➡"/>	10 <input type="button" value="➡"/>	
9	13 <input type="button" value="➡"/>	13 <input type="button" value="➡"/>	
10	13 <input type="button" value="➡"/>	14 <input type="button" value="➡"/>	
11	13 <input type="button" value="➡"/>	15 <input type="button" value="➡"/>	

6. Changes to the 'student' table

Search: •

student_id	first_name	last_name	st_major_id	gpa	sat	start_date
11	Eric	Ephram	1 <input type="button" value="➡"/>	4.2	900	2016-03-31
12	Greg	Gould	2 <input type="button" value="➡"/>	4.5	1200	2016-09-30
13	Adam	Ant	3 <input type="button" value="➡"/>	4.0	800	2016-06-02
14	Howard	Hess	4 <input type="button" value="➡"/>	3.5	600	2016-02-28
15	Charles	Caldwell	5 <input type="button" value="➡"/>	4.8	1400	2016-05-07

7. Changes to the 'assignment' table

Relations for table: assignment				
Name	Columns	FK Database	FK Table	FK Columns
assignment_ibfk_1	grade_id	tiy	grade	grade_id
assignment_ibfk_2	class_id	tiy	class	class_id
idx_student_id	student_id	tiy	student	student_id

Hard Challenge

Create a report for a student that shows what classes (s)he has left to take based on the major enrolled. So for example, if the major requires classes U, V, W, X, Y, and Z, and the student has enrolled in U, X, and Y, the remaining classes to be taken are V, W, and Z. You can assume if a student enrolled in a class that they student completed the class with a passing grade.

SQL Query : `select s.`student_id`, s.`first_name`, s.`last_name`, s.`st_major_id`,
group_concat(mc.`mc_class_id`) as classes_needed
from major_class mc, student s where
s.`st_major_id` = mc.`mc_major_id` and
not exists
(select * from student_class sc where
sc.`sc_student_id` = s.`student_id` and
sc.`sc_class_id` = mc.`mc_class_id`)
group by s.student_id`

 Query Favorites Query History				
student_id	first_name	last_name	st_major_id	classes_needed
11	Eric	Ephram	1	19,20,30,31
12	Greg	Gould	2	11,20,41
13	Adam	Ant	3	19,20,21,22
14	Howard	Hess	4	23,24,25,26,30,31,32

displaying class numbers as well corresponding to class id's

```
SQL Query:  select s.`student_id`, s.`first_name`, s.`last_name`, s.`st_major_id`,
            group_concat(mc.`mc_class_id`) as classes_needed,
            group_concat(c.`class_number`) as classes_number
            from major_class mc, student s, class c where
            s.`st_major_id` = mc.`mc_major_id` and
            mc.`mc_class_id` = c.`class_id` and
            not exists
            (select * from student_class sc where
            sc.`sc_student_id` = s.`student_id` and
            sc.`sc_class_id` = mc.`mc_class_id`)
            group by s.student_id
```
